Portfolio

Summary

Motivated Computer Science graduate with expertise in Data Analytics, Python, SQL, Excel, Power BI, and AI-driven analytics. Skilled in data preprocessing, exploratory data analysis, statistical analysis, data visualization, and dashboard development to generate actionable business insights. Eager to apply analytical and AI-powered solutions to support strategic business decision-making.

Education

KSRM College Of Engineering

B.Tech in Computer Science and Engineering – CGPA:7.75

Kadapa, Andhra Pradesh

2022-2026

Skills

- **Programming Languages:** Python, SQL
- **Databases:** PostgreSQL, MySQL, SQL Server
- **Data Analysis & Processing:** Pandas, NumPy, Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA)
- **Visualization & BI:** Power BI (DAX, KPI Cards, Slicers), Excel (Pivot Tables, Power Query, VLOOKUP), Matplotlib
- **Statistical & Analytical Skills:** Statistical Analysis, Data Visualization, Web Scraping
- **Tools:** Git, GitHub, Jupyter Notebook, Google Colab
- **AI & Automation:** Gemini API, Prompt Engineering

Professional Experience

Deloitte Data Analyst Virtual Intern – Excel, Tableau, Dashboarding

March 2026

- Analyzed industrial telemetry data using **Tableau** to derive actionable insights on machine performance and downtime.
- Designed and implemented Excel-based classification logic to evaluate equality scores, using nested formulas to categorize outcomes into Fair, Unfair, and Highly Discriminative ranges.
- Built interactive Tableau dashboards by **creating calculated fields** (e.g., Unhealthy downtime metric) and visualizations such as Downtime per Factory and Downtime per Device Type to identify performance bottlenecks.
- Developed a dynamic filtering dashboard enabling drill-down analysis across factories and device types, helping identify the highest downtime contributors and supporting data-driven decision-making.

PROJECTS

Customer Retention and Behavior Analysis – GitHub

- Situation: The company was losing regular customers who stopped buying again.
- Task: Find out why customers were not returning and how to bring them back.
- Action: Collected and cleaned **500K** sales records using Excel and Python; performed **cohort** and **RFM** analysis and made clear charts in Power BI.
- Result / Takeaway: Identified three main reasons for drop in repeat sales and helped raise returning customers by 12% in three months.

Sales Performance and Profitability Dashboard – GitHub

- Situation: Managers did not have a single view of sales and profit across regions.
- Task: Create a simple dashboard to track sales, margins, and top products.
- Action: Cleaned and merged data from multiple files using **SQL** and **Excel**; built an interactive Power BI dashboard with key KPIs and filters.
- Result / Takeaway: Helped managers make faster decisions and improved profit tracking by 20%.

Customer Churn Insights and Prediction using Random Forest – GitHub

- Processed and analyzed 7K+ telecom customer records using SQL, Power BI, and Python to uncover churn drivers.
- Automated data preparation and quality checks for 30+ business features, improving data consistency for reporting and analysis.
- Designed a churn analytics dashboard with 10+ KPIs and visualizations, enabling data-driven customer retention insights.
- Implemented a Random Forest churn prediction model using Python and Scikit-learn to identify high-risk customers and support retention efforts.

CERTIFICATIONS

- **Data Analytics Essential** – Cisco Networking Academy (2026)
- **Artificial Intelligence Fundamentals** – IBM (2026)
- **SQL and Relational Database 101** – Cognitive class.ai (2025)
- **Business Analytics with Excel** – Simplilearn (2026..)

Achievements

- Earned 4 industry certifications in Data Analytics, SQL, Artificial Intelligence, and Business Analytics.
- Led the college Kabaddi team as Captain during competitive events.
